

SUMMARY

I am a full stack web developer who is eager to dive into the tech industry. I'm expanding my knowledge everyday and find ways to help people create, build, and maintain their visions in the virtual world we live in today. I will incorporate my skills as a developer with my previously learned skills in customer service and payroll to become an integral part of any team.

SKILLS

FRONT END: CSS, HTML5, jQuery
FRAMEWORKS: Rails, Sinatra, Foundation
LANGUAGES: Ruby, JavaScript
TESTING: RSpec, Jasmine, Capybara
DATABASE: Postgresql
TOOLS: Heroku

PROJECTS

CROSSROADS

A mobile based web app built within a week with a team of four including myself. Crossroads uses the Google Maps JavaScript API and Google Places API. The app finds the route midpoint between two addresses and finds local places based on user input.

- Took lead on writing the JavaScript needed to have the API's function correctly with the application
- Implemented Devise and OmniAuth gems to allow users to create a native account or login using Google authentication

BEARD BUDDY

A web app built in 2 days that utilizes the Yelp API to find barber shops when a user inputs a zip code. The app returns 10 shops within that area showing the name, address, phone number, rating, and a review from Yelp.

- This app was created to learn Ruby on Rails and how to utilize the Yelp API.

EMPLOYMENT

NEW YORK RISING

Case Manager

Jun 2013 to Sep 2015

- Conduct program audits to confirm quality assurance of applicant files
- Analyze applicant construction inspection reports to confirm completed and outstanding work
- Monitor and track key program metrics associated with grants disbursed by the NY Rising Housing Recovery Program

CANON, INC.

Payroll Coordinator

Feb 2013 to Jun 2013

- Complete payroll audit queries to confirm accuracy of all changes/updates
- Maintain proper authorizations for all changes to ensure records are accurate and up-to-date
